Kids Can Program Too: Java Edition

By Ely Eshel

Createspace. Paperback. Condition: New. This item is printed on demand. 440 pages. This book addresses the curiosity of computer-literate youngsters from grades 6 through 12 who want to learn how to write their own computer programs. Although programming is serious, it can also be a lot of fun and this book turns the process into an enjoyable challenge rather than a boring task. For children: You may already know a lot about computers, and probably spend a lot of time using them. However, if you are curious about whats inside the computer, if you want to understand what makes it work, and how you can make it do what YOU want which is what programming is all about then this is the book for you. For Parents and Educators: Most children today practically live with computers, and they cannot even imagine a world without them. However, rarely are they given the opportunity to understand how computers actually work, let alone what programming a computer really means. There are no other books that satisfy the childs curiosity at a level that an average child can understand and enjoy. This book was created to fulfill that goal. Note: All the examples in...
