## Wood-Using Industries of New York Volume 1

By John Tyre Harris

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1913 Excerpt: .eye alone can produce a straight stick from what otherwise is a tangled, worthless, twisted shrub. Umbrella handles utilize waste from cane stock and thus the two industries are frequently combined. Several woods, however, such as mahogany and ebony, are used for umbrella handles and not for walking sticks. Beech contributes over 90 per cent of the wood reported in Table 36, and it goes almost exclusively into whip stock. Beech is elastic, easily worked, does. not check or warp badly, is moderately strong and makes splendid whip stocks and umbrella sticks. Its abundance and cheapness (\$23.16 f. o. b. factory) commend it above other superior but more expensive woods like sugar maple and birch. New York State forests alone contribute this important species to these industries. Bamboo is contributed by China and Japan, partridge wood comes from South America, Malacca from Southern Asia, Whanges from...

### Reviews

*It is fantastic and great. It is written in easy words and phrases instead of confusing. I am just delighted to explain how this is actually the best book I have got read through during my individual life and might be the finest publication for ever.*

-- Prof. Murl Shanahan DDS

*This pdf is definitely not easy to get started on studying but quite entertaining to read through. I am quite late in starting reading this one, but better than never. Once you begin to read the book, it is extremely difficult to leave it before concluding.*

-- Ms. Fatima Erdman
