

Time Reborn: From the Crisis in Physics to the Future of the Universe (Hardback)

By Professor of Physics at the Center for Gravitational Physics and Geometry Lee Smolin

HOUGHTON MIFFLIN, United States, 2013. Hardback. Book Condition: New. 229 x 157 mm. Language: English . Brand New Book. From one of our foremost thinkers and public intellectuals, a radical new view of the nature of time and the cosmos What is time? This deceptively simple question is the single most important problem facing science as we probe more deeply into the fundamentals of the universe. All of the mysteries physicists and cosmologists face--from the Big Bang to the future of the universe, from the puzzles of quantum physics to the unification of forces and particles--come down to the nature of time. The fact that time is real may seem obvious. You experience it passing every day when you watch clocks tick, bread toast, and children grow. But most physicists, from Newton to Einstein to today's quantum theorists, have seen things differently. The scientific case for time being an illusion is formidable. That is why the consequences of adopting the view that time is real are revolutionary. Lee Smolin, author of the controversial bestseller *The Trouble with Physics*, argues that a limited notion of time is holding physics back. It's time for a major revolution in scientific thought...
