Reviews

These kinds of pdf is every thing and helped me hunting ahead plus more. It generally does not cost too much. I am delighted to tell you that this is actually the finest publication we have study in my personal life and might be he finest ebook for at any time.
(Dr. Veronica Hoppe)

PROGRESS IN OPTICS: VOLUME 42 (HARDBACK)

ELSEVIER SCIENCE TECHNOLOGY, United States, 2002. Hardback. Condition: New. Language: English . Brand New Book. This volume presents six review articles devoted to various topics of current interest both in classical and in quantum optics. The first article, by S. Ya. Kilin, entitled *Quanta and Information*, is concerned with a multidisciplinary subject which involves optics, information theory, programming and discrete mathematics. The second article, *Optical Solitons in Periodic Media with Resonant and Off-Resonant Nonlinearities*, by G. Kurizki, A.E. Kozhekin, T. Optatrný and B. Malomed, reviews the properties of optical solitons in periodic nonlinear media. The article which follows deals with an effect and its inverse which is a manifestation of hindrance and enhancement, respectively, of the evolution of a quantum system by an external agent, such as a detection apparatus. The fourth article discusses the current status of a relatively new branch of physical optics, sometimes called singular optics. The next two articles respectively present a review of advances in two-photon interferometry and their relation to investigations of the foundations of quantum theory and an examination of transverse mode shaping and selection in laser resonators.
