By American Railway Engineerin Association

Forgotten Books, 2016. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from Proceedings of the Fourth Annual Convention of the American Railway Engineering and Maintenance of Way Association, Vol. 4: Held at the Auditorium Hotel, Chicago, Illinois, March 17, 18, and 19, 1903 The car suggested is clearly the forerunner of the various drop bottom cars for handling earth or ballast, some of which have recently been brought to a high state of perfection, and the method of support is a temporary trestle for construction alone. The use of trestles or trussels has been mentioned on the South Carolina Railroad In 18, a, and provision was made at that time for filling around the piles, for it is stated that The execution of the work throughout this division of the line is of a very substantial and superior character; especially through the valleys of Horse and V ise Creeks, where extensive sections of the trussel work have been substituted for the piling construction. In some cases the ele vation of the grade of road above the surface of the country rendered this mode of construction indispensable, and in other cases where the soil...
