This book usually ship within 10-15 business days and we will endeavor to dispatch orders quicker than this where possible. Brand New Book. Controlled Environment Agriculture Production of Specialty Crops Providing Human Health Benefits through Hydroponics provides useful information on agricultural technology management that enables the grower to manipulate a crops environment to the desired conditions. Specialty/functional foods can be produced through simple modification of nutritional composition and environmental controls. Management of chemical composition of hydroponic culture solution and physical modification of growing environments can enhance the performance of agricultural produce. Moreover, development and supplementation of special dietary components provides several human health benefits beyond basic nutrition. This book mainly include reviews and original research on the enchantment of growth and yield crop plants along with consistent production of secondary metabolites and antioxidants under controlled environments. Light quality mediated changes in nutritional quality and anti-oxidative properties of crop plants are also described. The final chapter reviews the current sensory perception of hydroponically grown fruits and vegetables compared to soil cultivation. The aim of this book is to represent a new way of thinking about sustainable production of specialty/functional foods using specialized culture techniques and demand oriented distribution. Interesting research on controlled environment agriculture from around the world are brought together in this book to produce a valuable resource for teachers, researchers, commercial growers and advanced students of plant biological science.
