In this book, leaders of the WAP standards process present the most complete discussion of the new WAP 1.1 standards, architecture, specification, and application development. This book gives decision-makers the information they need to plan strategies, and developers the information they need to build solutions -- starting today. It begins with an overview of WAP 1.1, describing the motivation behind the standards, and the relationships between each component of the WAP specification. Next, it discusses each component, covering fundamental design principles and operations. 678 pp. Englisch.
